County: Kings

Comment: I'd like to express my apprehension at the possibility of an unproven private organization attempting to build an artificial island so close to Long Beach, NY. As someone who enjoys the ocean in this vicinity I want to say that these lands are delicate and should be considered a precious resource for all New Yorkers. It is not worth risking environmental catastrophe on our shores to further invest in fossil fuel infrastructure. The LNG terminal proposal is obviously about the profits of a private group of investors. The risk is much too high.
