November 9, 2008

Good Morning,

I am writing today as a citizen, parent and grandparent. I am concerned about the future of our economy and our planet. Please consider my voice as you set New York's energy plan for the next decade.

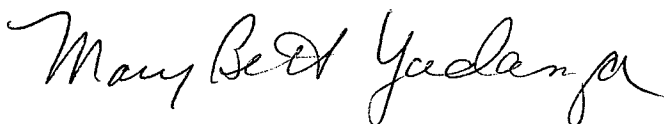

I want to see New York invest in clean, non polluting renewable energy. I would like these energy sources to be developed close to the area of demand, thereby growing local jobs to aid the economy.

I believe it is unwise to continue putting valuable resources into energy production that pollutes or creates by products that cause future issues. This means a shift away from nuclear, natural gas, coal and petroleum.

I want you to know that I have paid a renewable energy premium on my power bill since the option became available. It is important for us to look to the future and protect that future.

I would appreciate a response to this letter letting me know my voice is being heard.

Thank you for your time and service,

A handwritten signature in cursive script that reads "Mary Beth Yadanza".
