To whom this may concern,

It is with a full heart that I employ your time to hear what I have to say. I am a college graduate and employee of Ernst and Young. I realize that I would like very much to pass this beautiful world on to my children and perhaps my future grandchildren as well.

I support all efforts to promote energy efficiency and conservation. It's time to unleash New York's renewable energy potential. Under no means do I support new coal or nuclear energy. We need to encourage our energy to be limited to local demand and usage.

Thank you,
